

NEMA HP6 (Types ZHS & ZHSS)

Low Smoke, Zero Halogen Silicone
600V & 1000V, 150°C

APPLICATION

This insulation material is unusual in the unique balance of properties it provides. It meets the U.S. Navy requirements for smoke, toxicity, acid gas and halogen content. It is durable and highly flexible. It is also inherently flame resistant and can be used for high temperature applications.

CONDUCTOR

Soft annealed tin plated copper, stranding as listed in the below table.

INSULATION

Extruded layer of Silicone insulation.
